Educated Google

For HUM 249 Prof. Paul Robinson

Advanced Google Search. Go to Google.com and click “Advanced Search”. Enter your search term, then below, limit your search to .edu websites in “search within a site or domain name”. This will give you results only from Educational Websites (e.g. Colleges and Universities). You can also search other types of domains under the areas, such as, .gov, .org, etc. In the example below we searched “African American Studies” and limited to .edu websites utilizing the “Search Within A Site Or Domain “ box.
